DETAILED ACTION

The preliminary amendments filed 1/18/00 and 10/30/00 have been entered.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 15 and 18-33, drawn to a modified VEGF polypeptide and encoding nucleic acid, classified in class 530, subclass 350.
- II. Claim 16, drawn to method of treating using a modified VEGF polypeptide, classified in class 514, subclass 12.
- III. Claim 17, drawn to an assay for identifying agonists or antagonists of KDR and/or FLT receptor, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

Invention I is related to inventions II and III as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the polypeptide of invention I can be used for a materially different process other than invention II or III, such as in the affinity purification of the KDR or FLT receptor or for the production of an antibody that binds VEGF.

Invention II and III are related in that both use the same product; however, the inventions are distinct because they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operations: contacting a candidate substance with a VEGF variant and administering a VEGF variant to a patient, respectively. Also, the inventions have different effects: identification of an agonistic or antagonistic candidate and treatment of a patient, respectively.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, have recognized divergent

Art Unit: 1646

subject matter, and because each invention requires a separate non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Claire M. Kaufman, whose telephone number is (703) 305-5791. Dr. Kaufman can generally be reached Monday through Thursday from 8:30AM to 12:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, can be reached at (703) 308-6564.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Official papers filed by fax should be directed to (703) 308-4242. Faxed draft or informal communications with the examiner should be directed to (703) 308-0294. NOTE: If applicant *does* submit a paper by fax, the original signed copy should be retained by the applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office. **Please** advise the examiner at the telephone number above before facsimile transmission.
